G. M. STERREERG, of Fort Riley, has re crived a patent for a Frag Drier. THE market was never so plentifully sup plied with all kinds of vegetables and early

fruits as it is at present. Two of Kit Carson's children have been sent to J. B. Rees, near Parkville, Missouri who is to have them educated.

ALTHOUGH THE TIMES is the medium through which all the official news of the city and county is published, we furnish the paper at the same rates as are charged by the commonplace journals.

ENGINEER CAVANAUGH made a thorough trial of Leavenworth coal, fresh from the shaft, vesterday, and reports it far superior to that from either Fort Scott or Lexington. He says there is no coal in this part of the country equal to it.

Repudiated.—Paul Dexter left Dan.

Stone to close up his saloon Saturday night, and went away. Soon after, Cerf came in with his jeff grand and wanted a drink. Dan said "you have repudiated my color down at your place, and I shall set nothing out for you." As there was no else there to wait on you." As there was no else there to wait on him Cerf didn't get his toddy.

ACCIDENT.—Nellie Hungerford, daughter of Mr. Seth Hungerford, picked up what she supposed to be an extinguished firecracker, on the morning of the Fourth, and cracker, on the morning of the Fourth, and as she was holding it to her face it exploded, filling one of her eyes with the material of which it was composed and burning the organ severely. It is doubtful if the sight of

speaks well for Kansas.

HORRIBLE.-We learn that a young woman in the vicinity Seventeenth and Dacotah streets was taken with the pains of childbirth a few days ago, and before she could be pre vented ran into an outhouse. Persons suspecting her motive in doing so, attempted to enter the door, but were forcibly prevented by the woman, until too late, for when they had effected an entrance, the child was found in the varit beneath, and died before it could be rescued. The mother of the child is now confined to her bed by consequent illness. We did not learn that any measures had been taken to arrest her.

THERE was considerable carelessness exhibited in throwing fireworks about on Monday night. However patriotic a person may be, it yet seems the part of courtesy to allow him to choose in what manner he shall sacrifice himself upon the national altar. For instance, in framing the Declaration of Independence it is hardly consistent with the gen-erally received idea of our forefathers' wisdon, to believe that they intended the larger sized brecarding as a steady diet for the eye, or that the conguinary compound of charcoal and sulplane about be generally adopted as national tooth-powder. Therefore, we are led to say that the manner of handling these things on Delsware street, was anything but pleasant to the victims selected for such nitro-glyserine experiments, and it is a won-der that more people were not hurt.

A New Gammano Davice—Since the passage of a law imposing a tax on "pigeon hale" tables, some of the developm saloon keepen have been exercising her ingenuity in devaing substitutes for that facinating game. Une of them has his upon the following device: He provides exchange of his customers with a small lump of sugar. The lumps are placed side by side on the counter and remain there until a fly lights upon one and remain there until a fly lights upon one of them. The owner of that lump has to pay for the drinks. The inventor of this game generally takes a hand in himself, and as a fy has never been known to light upon his lump, it is supposed that he soaks it in vinegar or some other liquid that repels the flies. A committee has been appointed to investigate this alleged strategy, and if the suspicion shall prove well-founded, the landlore will be required to treat the crowd,—St. Louis Republican.

The author of that mournful editorial e saloon bummers should be careful about getting into that sugar business. It might become necessary for him to repudiate the sugar and go back on the fly.

QUEER signs are among the specialities of Paris. There is one over the door of a barber in the Faubourg St. Dennis, representing an effigy of Absalom hanging by the hair, with an inscription which may be thus done in English.

The summer rains sheeked off earlier than usual. This was anticipated, from the fact that but little snow had fallen in the mountaine during the winter. Former observatains during the winter. Former observa-tions pointed to such results. The data of i-8 Chester

ECONOMICAL RESULTS. The cool weather of the earlier portions of A. M. CLARK, the month was very favorable to the growth and maturing of the wheat crop; protected by the continuous high winds that warded off the bad effects of the frequent rains which SECOND NATIONAL BANI

fell, usually at night.

The yield of this crop is a full average, and the quality excellent. The rains ceased with the coming in of the harvest, consequently the grain will thresh out bright and sound.

The corn has a dark green color; has Buys and Sells Government Bonds, and does a gen-

copious rain about the time it begins Early potatoes are nearly ripe, and yield well; but the lase crop will be short, unless rain comes as a few days.

The prospects of a rich unitage are encouraging, though the fruit during the set

eason inclined to rot; but the recent dry weather checked this source of deterioration Early apples have been in the market for several days. The quality and size are fair, but not abundant. PATENT Building Paper at Ingersoll's Lumbs

METROPOLITAN FARMING.—Dr. J. W. Morris and John W. Harris, Esq., yesterday completed the harvesting, threshing and delivery of fourteen acres of wheat from a field adjoining the Government Reservation, between Tenth and Twelfth streets. The total yield was 401 bushels and 8 pounds, 63 pounds to the bushel, and 30 bushels to the acre. This is a splendid yield and creeks well for Kansas. The Writings of a Physician whose reputation is Union-wide should be worth reading.

Dr. Whittier publishes a Medical Pamphlet relating to venercal diseases and the disastrons and varied consequences of self abuse, that will be sent to any address in a sealest envelope by two stames. It contains full symptom lists that will be sent to any address in a sealest envelope by two stames. It contains full symptom lists that will enable those afflicted to determine the nature of their cases that will answer almost as well for the purpose of treatment as a personal interview, but where it is convenient the Doctor should be consulted per onally. These having friends that may require advice, can supply them with this valuable pemphlet by sending their address, with stamp. Thus you can assist the unfortunate without their knowing their benefactor. Certainly no object is of more importance than purity blood and perfect manhoad.

It is self evident that a physician who confineshimmelf exclusively to the study of a certain class of diseases and treats thousands of cases every day, must acquire greater skill in that specialty than one in general practice. B. A. FAHNESTOCK'S VERMIFUGE:

IT IS NOW OVER PORTY YEARS SINCE THIS I medicine was offered as a remedy for Worms, and from that time its reputation has steadily increases until at the present day it is almost universally acknowledged throughout nearly all parts of the world to be the sovereign remedy. Worm Confections made more for the purpose of pleasing the pelate Cann of overcoming the disease, have been manu-factured all over the country; but their short lease of life is nearly exhausted, and B. A. Fahnestock's Vermifuge continues to grow in favor daily. Chilthe is nearly exhause, and it favor daily. Chil-fern often look pale and siekly from no other cause han worms, and spasms are most frequently the re-ult of those hidden exposers and miners.

When they are irritable and feverish, sometimes When they are irritable and feverish, sometime-craving food and eating raveneously, again refusing wholesomediet, tossing restlessly in deeping, mean-ing and grinding the tooth, then be assured these symptoms are indications of worms.

Uneasinese and pain in the abdomen, with swell-ing and hardness, are generally attendant upon the presence of these hidden soppers and miners.

Many a helpless child has been laid in the grave, when the disease which caused its death has been entirely misundenteed, and when worms have re-ally been the cause. It has been proved beyond civil, that worms exist in the human system from chrliest infancy, therefore percent—especially moth-ers, who are more constantly with their children, cannot be too observant of the first symptoms of worms, for so surely as they exist, can they be safely and speedily removed from the most dehigate infant, by the use of B. A. Fahnestock's Vermi-

infant, by the use of B. A. Fahnestock's Vermiintant, by the use of R. A. Fahnestock's Vermi-fuge.

Physicians do not hesitate to recommend it and use it in their practice, and many of the most enti-ment of the profession, from all parts of the country testify to its uniform success. In fact, it NEVER FAIIS. It has frequently been given to children as a sife purgative, not suspecting the cause of the illness, and large quantities of women were dis-charged and immediate relief afforded.

Great carlion must be used by every purchaser to be his own judge in one sense, and to examine every tottle be buys of it. The simple name of FAIRSE-TOCK is not sufficiet. He must look closely and carefully to see that the initials are R. A. FAIRSE-STOCK, and be satisfied with nothing else.
